Evaluation runs: **replog** (replicated-log-aneris)

generated 2026-11-05 from brain-data 0799b9755 2026-11-05 11:44:26 +0100

Every campaign run on this benchmark, one row per instance (variant, specification, communication model, size) and engine; the newest run of an instance wins. Expected verdicts (the rule file): no entry in the rule file (the README states the expectation). Blue rows are at the current pins (TraceForge 367cdc6, whose predecessor 9a0629e is equivalent for every engine but the join; merge join 367cdc6; JMC 3c43b2d2): a rerun gives the same result. Red rows are superseded (an older pin, or the in-memory join that the merge join replaces) and their rerun is pending. A planned instance without a measurement is not a row: it is listed under "Not run". G_{spec}, G_{impl} = the graphs of the specification and of the implementation (the stateless engine's own count of specification graphs explored, repeats included, is G^{expl}_{spec}); G_x = the implementation graphs no specification graph covers (violating pairs); T = wall seconds; M = peak resident MiB; tier = the run's time and memory limits; * marks a verdict other than the expected one; 🕓 = the time tier was reached; oom = the memory limit was reached.

stateless

stateless: pair **asyn-fault**, model fifo, expected conforms

4	2940	4900	1218	violation*	0.3	8	1 h, 250 GB	3	brain01, 2026-11-02

Not run (context-free twins online, Rust implementation (TraceForge) against the Java port's export).
planned but never scheduled (grid points beyond the ladder): 8 fifo asyn-fault, 8 fifo correct, 9 fifo correct, 9 fifo asyn-fault.
skipped: a smaller size had reached its limit: 8 fifo asyn-fault.
