Evaluation runs: **pbkv** (a2-store)

generated 2026-11-03 from brain-data 03b0b57cc 2026-11-03 11:21:51 +0100

Every campaign run on this benchmark, one row per instance (variant, specification, communication model, size) and engine; the newest run of an instance wins. Expected verdicts (the rule file): pb: expected conforms; pb-br: expected conforms; control-early-ack-primary: expected conforms; control-early-ack-fwd: expected conforms; silent-put: expected violation; early-ack: expected violation; early-ack: expected conforms (one operation: nothing to reorder or read stale); stale-get: expected violation; stale-get: expected conforms (one operation: nothing to reorder or read stale); sh: expected conforms; misroute: expected violation; misroute: expected conforms (one shard, or one operation). Blue rows are at the current pins (TraceForge 9a0629e, merge join 367cdc6, JMC 3c43b2d2): a rerun gives the same result. Red rows are superseded (an older pin, or the in-memory join that the merge join replaces) and their rerun is pending. A planned instance without a measurement is not a row: it is listed under "Not run". G_{spec}, G_{impl} = the graphs of the specification and of the implementation (the stateless engine's own count of specification graphs explored, repeats included, is G^{expl}_{spec}); G_x = the implementation graphs no specification graph covers (violating pairs); T = wall seconds; M = peak resident MB; tier = the run's time and memory limits; * marks a verdict other than the expected one; 🕓 = the time tier was reached; oom = the memory limit was reached.

stateless

stateless: pair **control-early-ack-fwd**, model fifo, expected conforms
